

# Quality policy IP

## Mission

Injextru Plastics creates value by designing and producing plastic profiles for industrial customers.

## Vision - Policy statement

Injextru Plastics produces thermoplastic profiles for industrial customers and it aspires to continue growing on a sustainable and profitable way.

Our growth is based on co-creation, cost efficiency and an excellent quality and service.

We consider it as our goal to be a qualitative and involved partner for our existing clients and to use our expertise in co-creation to acquire new customers.

To achieve our long-term business goals, Injextru Plastics makes sustainability a top priority. This affects both internal and external stakeholders

We treat our employees with integrity and respect and we focus on lifelong learning, continuous improvement and a safe work place.

We care for the environment by recycling and by using all means in the most efficient way.

Finally, we want to treat our suppliers respectfully and with integrity.
